

Biocence™ Botanical OTC

Antiseptic, the all natural, multi-use drug that **kills MRSA, H1N1 & Superbug** spore and vegetative forms of bacteria and virus safely on contact with no harm to non-compromised healthy cells.

What is Biocence?

Biocence is the **only** all natural, organic and botanical (green) antimicrobial **drug** granted **Registration** as an *OTC Drug* in the **Drug Registration and Listing System US Food and Drug Administration (FDA)**. Biocence also meets the **PCPC's rigorous standards for safe OTC products and as a preservative system.**

How effective is Biocence?

Extensive 3rd party ISO/FDA licensed labs and clinical testing confirms that Biocence is the **only** Topical Antiseptic that **kills all** organisms tested to date (800 plus pathogenic/opportunistic pathogenic microbes (bacteria, virus, yeast, mold and fungi), either **on contact** or **in less than 30 seconds** without harm to healthy, uncompromised epithelial and endothelial cells.

How can Biocence be used?

Prophylactic Use. Biocence **remains microbiocidal for 3-4 hours on both animate and inanimate surfaces**; alcohol antiseptics are fully effective for less than 20 mins, harm the skin, and may spread viruses & bacteria. Alcohol products take less than 10 seconds to evaporate or volatilize, and in that time, pathogens are not killed. Also, alcohol products are not effective in "soiled" clinical situations.

Treatment. Biocence is used to treat a wide range of infections. Physicians have used Biocence to treat MRSA, staph, diaper rash, and athlete's foot but claim that **the potential applications are unlimited.**

Health. Biocence gives immediate microbiocidal activity against pathogens, **yet "feeds" beneficial microbes.** All active ingredients are of **food grade quality, hypoallergenic, and safe to use on children.**

How does Biocence Work?

Biocence creates its "Pan-Microbiocidal" by the panoramic, vibrational or oscillatory frequencies in the Biocence Botanical Complex (BBC) that cause organismic disruption by confluent entrainment with the organisms' *Mortal Oscillatory Rates*. This explains why the BBC has shown, repetitively, a Trans-Domain and Viral Kingdom "cidal" effect, regardless of the domain/kingdom microbe. As **Nikola Tesla**, the incomparable electro-physicist, stated: *"If you wish to understand the secrets of the Universe, think of energy, frequency and vibration."* Unlike many other sanitizers and antiseptic products, Biocence does not require a *metabolic dynamic* or *growth phase* to kill microbes.

Why do you need Biocence?

There are an **estimated 2,000,000 cases** of secondary infections annually in the health care industry of the U.S. **MRSA alone accounts for about 900,000** of these infections. These infections cost over **\$45.5 billion in treatment alone**, and billions more are spent to settle associated lawsuits.

Biocence is an invaluable tool for wound treatment, infection prevention, and infection transmission prevention.

Protect yourself and community from H1N1, MRSA and secondary infections while curbing dependence on antibiotics for treatment.

Professional Testimonials

F

"World-wide, galatias disasters and their resultant infectious disease pandemics and the escalating antibiotic-resistant mutagenesis of 'common' bacterial species has engulfed the world's populations in an 'Infectious Armageddon' never before seen or experienced. **Biocence is a significant entry for a plausible solution for many, if not theoretically all, infectious disease epidemics, whether bacterial, viral or fungal in origin.**

The advent of this product line has 'rainbow' potential and with the unpublished, objective third-party infectious disease specialists enumerating over 800 pathogenic microbes in all Family/Genus/Species being 'killed' within 30 seconds of product exposure, introduces a formidable opponent in this globally-expanding war on microbe escalation... **I can and will truthfully attest to the clinically awesome efficacy of this product and its unlimited potential in human and veterinarian infectious applications, secondary to its 'cidal' activities in innumerable and ALL microbial infections tested to date."**

TIM CHAPMAN, M.D., IMS (*Integrative Medical Specialists*) received his Doctorate of Medicine from the University of Cincinnati School of Medicine in 1969 and completed his Internship/Residency in Obstetrics and Gynecology at St. Joseph's Hospital in Phoenix, Phoenix Indian Referral Hospital and Maricopa General Hospital, Arizona in 1973.

Dr. Chapman became certified in Obstetrics/Gynecology in 1975 and became a Fellow in the ACOG (American College of Obstetrics and Gynecology) in 1976. Dr. Chapman was named as one of two OB/GYN specialists as Advisors for the Army Medical Corp during the Vietnamese Evacuation Operation New Life. Dr. Chapman is a member of the Flying Doctors of Mercy.

more

I have now been using Biocence for my patients for over a year. I have several cases where the application of this compound has resulted in improvement and resolution of skin infections caused by MRSA (i.e. Methicillin Resistant Staph Auereus).

In addition, I have also used it with success with patients who have an indwelling gastric tube for infections that occur around the opening.

I recommend it highly as a safe and effective treatment for these conditions and will continue to use it on our patients as well.

Sincerely,

Ric S. Garrison, M.D.

I work in Infection Prevention at Mission Hospital, Mission Viejo. I recommended Biocence seeing dramatic improvement in an MRSA skin infection that, despite a year of topical and oral antibiotics had not been completely healed.

Thanks so much!
